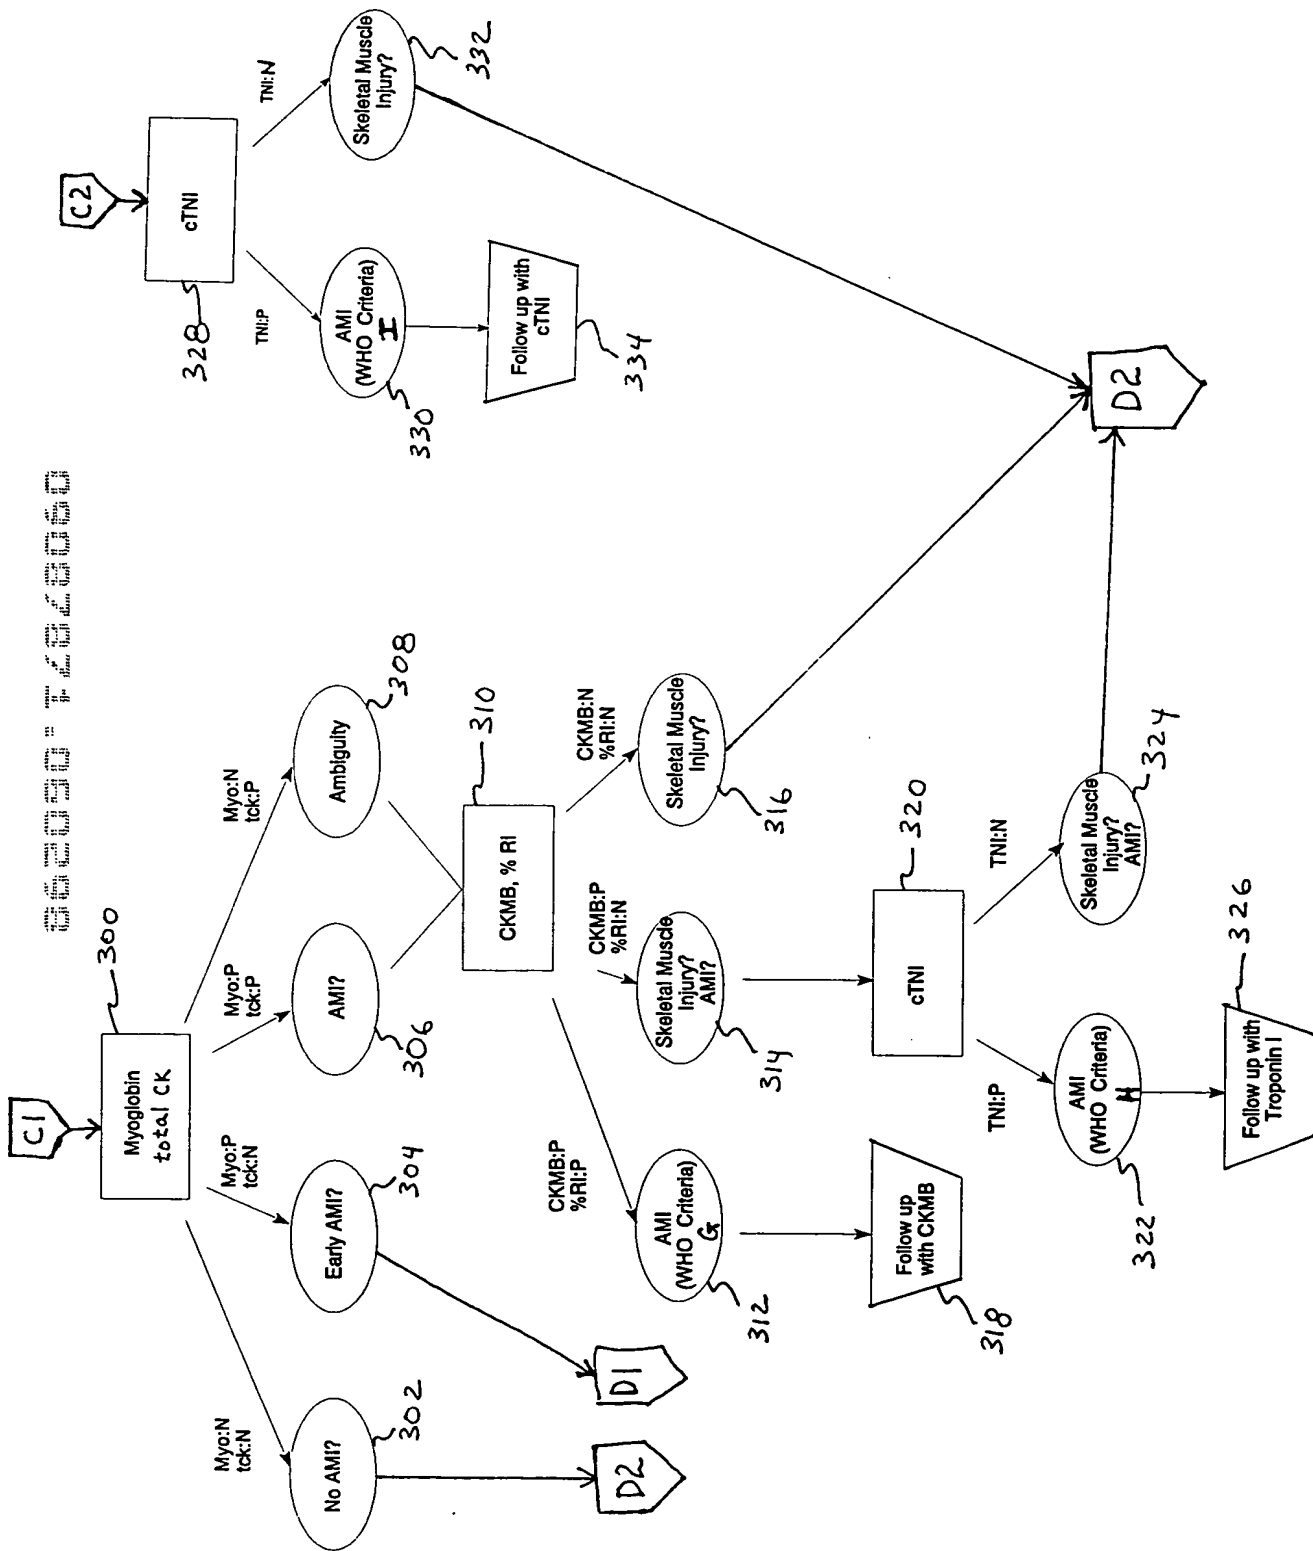

FIG. 1C

FIG. 10 is a flowchart illustrating a method for diagnosing cardiac damage. The process begins with a decision diamond D1, which leads to a process box 400 labeled "Myoglobin total CK". From box 400, three paths emerge based on Myoglobin and CK-MB results:

- Path 402 (Myo:N tck:N):** Leads to an oval labeled "No AMI?". This path terminates at an exit diamond E1.
- Path 404 (Myo:P tck:N):** Leads to an oval labeled "Early AMI?". This path also terminates at exit diamond E1.
- Path 406 (Myo:P tck:P):** Leads to an oval labeled "AMI?". This path leads to a process box 410 labeled "CKMB, % RI".

From box 410, three paths emerge based on CK-MB and % RI results:

- Path 412 (CKMB:P %RI:P):** Leads to an oval labeled "AMI (WHO Criteria)". This path leads to a process box 418 labeled "Follow up with CKMB".
- Path 414 (CKMB:P %RI:N):** Leads to an oval labeled "Skeletal Muscle Injury? AMI?". This path leads to a process box 420 labeled "cTNI".
- Path 416 (CKMB:N %RI:N):** Leads to an oval labeled "Skeletal Muscle Injury?". This path leads to an exit diamond E2.

From box 418, the path leads to a process box 422 labeled "AMI (WHO Criteria)". From box 422, two paths emerge based on AMI (WHO Criteria) results:

- Path 424 (TNI:N):** Leads to an oval labeled "Skeletal Muscle Injury? AMI?". This path leads to exit diamond E2.
- Path 426 (TNI:P):** Leads to a process box 428 labeled "cTNI".

From box 428, two paths emerge based on cTNI results:

- Path 430 (TNI:N):** Leads to an oval labeled "NO CARDIAC DAMAGE". This path leads to a process box 434 labeled "CONSIDER NON-CARDIAC ORIGIN OF CHEST PAIN".
- Path 432 (TNI:P):** Leads to an oval labeled "CARDIAC DAMAGE". This path leads to a process box 436 labeled "Follow up".
